Re: Lighting Controls Under Skylights

Dear Mr. Gray,

I received a copy of your July 2nd letter to the California Energy Commission expressing NEMA's support of the *Lighting Controls Under Skylights* proposal. As the primary technical author of the proposal, I am pleased that NEMA endorses the general concepts of the proposal.

I have talked with Dave Peterson and Doug Paton of the Watt Stopper Company about the detailed suggestions contained in your letter. The suggestions in this letter and the other suggestions they have made over the phone are good and will help improve the proposal.

I have asked Dave and Doug to review their suggestions with the NEMA Lighting Controls Council and that the Council membership either as a group or individually make suggestions to enhance the *Lighting Controls Under Skylights* proposal. I want to assure that I am addressing the concerns of the lighting controls industry as a whole when performing an analysis of suggested revisions to the proposal.

I look forward to talking with you in person.

Yours truly,

Jon McHugh, PE, LC
